

SUBJECT: Job Description – Solid Waste Management

TARGET: Engineering or Science Degree Trainee

The company

ECOGESTUS, Resíduos Estudos e Soluções Lda is dedicated to finding new and innovative solutions for organizations involved in municipal waste management. Research and development investment is the cornerstone of EcoGestus' ability to deliver advanced, engineering services.

The combination of extensive environmental knowledge, a broad spectrum of innovative products and outstanding customer service has made EcoGestus the preferred source for the best solutions in the field of municipal solid waste management.

Our involvement and support with on-site training and follow-up visits ensure the maximum benefit to customers.

Job Description

Under the supervision of the Senior Consultant, the Trainee performs engineering, managerial, administrative and communication tasks. Essential job functions of the Trainee position include, but are not limited to:

- **Engineering calculations**

Accurately completing detailed engineering calculations on a daily basis and delivering reports concerning waste management in municipalities. Software knowledge required: spreadsheets and writer sheets. English is a must as a foreign language.

- **Working Conditions**

Trainees must fit within a management hierarchy. Trainees interact with, solve problems for, motivate and serve a large group of people. They must handle multiple tasks simultaneously, are constantly prioritizing and are frequently interrupted. Trainees need to be alert, positive and approachable by everyone. They must cope effectively with widely diverse personalities.

- **Working hours**

Within the range (9h00 -18h30), additionally involving periods of research in other towns and cities, in Portugal and abroad.

Financial conditions

Salary according to experience and level of qualification shown by the applicant.

Accommodation

In the low season months (Oct – June), plenty of accommodation is available in Figueira da Foz (room less than 125 euro), and in the nearby University town of Coimbra (40 km; 1 hour by train).
